## WELCOME TO KAZAKHSTAN

Kazakhstan is the world's largest landlocked country, and the ninth largest in the world, with an area of 2,724,900 square kilometers (1,052,100 sq mi). It is a transcontinental country largely located in Asia; the most western parts are located in Europe. Kazakhstan is the dominant nation of Central Asia economically, generating 60% of the region's GDP, primarily through its oil/gas industry. It also has vast mineral resources.

The territory of Kazakhstan has historically been inhabited by Turkic nomads who trace their ancestry to many Turkic states such as Turkic Khaganate etc. In the 13th century, the territory joined the Mongolian Empire under Genghis Khan. By the 16th century, the Kazakh emerged as a distinct group, divided into three jüz (ancestor branches occupying specific territories). The Russians began advancing into the Kazakh steppe in the 18th century, and by the mid-19th century, they nominally ruled all of Kazakhstan as part of the Russian Empire. Following the 1917 Russian Revolution, and subsequent civil war, the territory of Kazakhstan was reorganized several times. In 1936, it was made the Kazakh Soviet Socialist Republic, part of the Soviet Union.

## HUMAN BEINGS HAVE THE RIGHT TO DIE WITH DIGNITY

Justice Ashok Bhushan passed the verdict allowing 'living wills' that will authorise the withdrawal of all life-support systems if doctor certifies the patient has terminal illness.

Some people on condition of anonymity said the verdicts have been a relief. My father suffered stroke. Despite the best treatment possible he became a vegetable. This decision will help a person die with dignity and prevent hospitalisation prolonging life artificially when there is already no hope of recovery. The happiness of being unable to help my father has been over after 20 years, he said.

Another individual from Ahmednagar said a person who slips into coma and becomes unresponsive and whom doctors say the chances of waking up are less than 5% should be allowed passive euthanasia. "Imagine the state of his/her family who go to hospital every day hoping that he/she will wake up. Isn't that a relief for them too?" she asked.

Bhaby Singh, a teacher, said the decision cannot be welcomed as passive euthanasia means a patient is neglected. It's nothing but murder. The doctor should not be allowed to use life support, she said. She said that passive euthanasia should be allowed only when the person falls into irreversible coma. The SC has now allowed terminally ill patients to accept death, she said.

Strian Singh Rattan said the decision is in line with the concept that a dignified death is better than a miserable life. So the SC is right in passing the judgment. It could have prevented the suffering of people like Aruna Shoban and many others, he said.

Rattan said that he would be happy with the times. He said that if there is no possibility of cure passive euthanasia is the right choice.
